

PROJECT PROFILE

Geberit Headquarters

PROJECT DESCRIPTION

Geberit is a European market leader in sanitary technology. Following the acquisition of Staffordshire business, Twyford, Geberit needed a new headquarters to support its growth strategy.

The new 22,500 sq ft, state-of-the-art office and training centre, is located at Tournament Fields, on the outskirts of Warwick.

Our works, on the construction of the new headquarters, consisted of an initial reduce level dig and the relocation of the surplus materials to a local green site. To reduce our impact on the environment, we developed an earthworks strategy that ensured all materials were recycled, reducing the need for disposal to a landfill site.

Our package also included: the formation of concrete foundations and ground beams; installation of internal and external drainage, including a large storage tank and attenuation system and concrete floor slab.

We also carried out a range of external works, including: tarmac surfacing, block paving and landscaping.

Sector
Commercial

Customer
Benniman Construction

Location
Warwick

Cost
£0.45m
