

PROJECT PROFILE

Starbucks Drive-Thru Coffee Outlet, Banbury

PROJECT DESCRIPTION

M&T Midlands were delighted to be handed the contract to work on and complete the major groundworks for a new Starbucks Coffee drive-thru outlet in the heart of Banbury, Oxfordshire earlier this year.

Although the work was completed in July 2023, the project was in danger of being cancelled when the initial main contractor suddenly went into administration, just weeks before the planned completion date.

With an extensive amount of work already completed, Matt Greevy, stepped in to assume responsibility for the project and negotiated with the site owners, Paloma Capital and Graftongate, to lead the project as the main contractor to see it through to completion.

M&T carried out extensive site clearance and earthworks to prepare the site for the retail outlet to be constructed. The full scheme of work including the installation of drainage and services across the site, before laying down access roadways, block paved car parking for customers and completing soft landscaping and associated external works across the site.

This project demonstrated our commitment and ability to work through potentially critical situations and find the solutions that meets the needs of our clients.
